

# KPI Dashboard

## VIP solution for KPI dashboard

Virtual Intelligence is the term relative to the use of Artificial Intelligence (AI) within a virtual world. Virtual intelligence is the intersection of virtual environments and Artificial intelligence. Our built up plate form will benefit the Organization.

- We identify, create and capture your Key Performance Indicators(KPI) and present pictorial metrics and Dashboards.
- These parameters captured by us in real-time or using historical data and render the key information in user-friendly formats.
- KPI Dashboard can have reports on production, sales, performance, efficiency of the equipments and resources involved in the operations.
- Analysis of data helps the organization to arrest revenue leakage in various departments and improve efficiency.
